

DRIVE GROWTH USING YOUR DATA

An extensible, secure and fully customizable
analytics platform for R2

Utilitize the
power of Open
API protected
by industry
leading data
security

Analyze your
data with
real-time
customized
dashboards

Generate reports and
schedule auto delivery
via email

Harness the power of all your databases and get to the bottom of your bottom line

Real-Time Intelligence

R2 Hero is an advanced data analytics module designed to elevate your data-driven decision making process. With intuitive dashboards, customizable reports and dynamic data visualizations, you can effortlessly transform raw data into actionable decisions to drive growth for your organization.

UNLIMITED DATA

- Open API to connect to unlimited databases.
- Drill down data with extreme simplicity.
- Craft mighty data views within the same report.

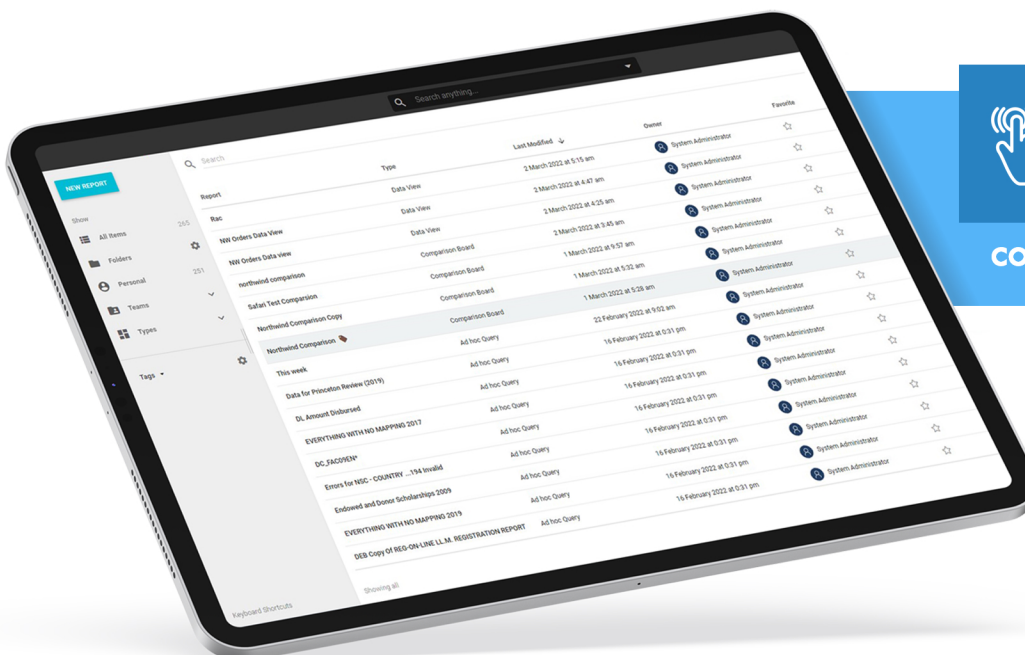

FULLY CUSTOMIZABLE

- Drag and drop columns, adjust sizing, create pivot tables and say goodbye to print previews.
- Schedule dashboards to refresh in any time-frame for data to repopulate.
- Brings together data from multiple tables and views to give you an unified report.
- Assign user rights and edit access to keep sensitive data secure.
- Create different dashboards for teams, departments and individuals.
- Email generator to schedule reports to be in your team's inbox before anyone has had their first sip of coffee.

CALCULATE REVENUE IN SECONDS

Apply multiple costs from multiple datasets in the calculator function to reveal the total order cost, revenue, and margin.

R2 HERO WILL SAVE THE DAY AND HOURS OF YOUR TIME!
